

Letter of Recommendation

To Enterprise Singapore,

Medtronic International Ltd. would like to recommend Cerebra.ai Ltd., a Kazakhstan-based developer of medical software for stroke diagnosis, in its application to set up a permanent business establishment in Singapore.

Cerebra.ai's remarkable potential in advancing digital health innovation was recognized at the Medtronic APAC Innovation Challenge (MAIC) which was also supported by the Singapore Economic Development Board (EDB). The company was selected as one of the Top 10 Finalists out of 323 participating enterprises for showcasing their ability to deliver improved health outcomes for patients. Their flagship innovation is a software leveraging artificial intelligence and machine learning to drive informed clinical decision-making in stroke diagnosis.

We are confident that Cerebra.ai's commercial presence in Singapore will make it poised to be a valuable contributor to the growth of digital health technologies and capabilities.

Sincerely,

Sudeep Dhariwal

Senior Director, Business Development & Strategy and Channel
Medtronic International Ltd.
